

BURNABY BLUE FOUNDATION

2010 NEWSLETTER

OUR SCHOOLS ARE COMPLETED

Our building work in Kataboi is now completed and we have built a Nursery School which is now fully functioning.

The School is now teaching 150 children!

The School Committee (below) have given us a resounding vote of thanks, however are keen that we don't stop here!

WATER

Our next task is to ensure that we can get water to the school. The children now carry their water to school and it is centrally used in the kitchen area shown below.

Water is available from a borehole 3 km away. Oxfam have recently installed a pump and would pay for half of the pipeline.

THE FUTURE IN KATABOI

We have started negotiating with Terre Des Hommes to start financing teachers at the school. We have also been told by the local government that they are keen to turn the nursery into a primary school.

This would be fantastic as it would really improve education in the area and the government would fund the running of the school leaving us to concentrate in other areas.

THANK YOU

A big thank you again to all who have supported our activities. Please do look at the web site www.burnabyblue.com and, of course, please remember us if you are able to make a contribution, no matter how small – we have so much to do and we do need your help.
